

Support Your
Bone Health
with...

OsteoSun™

Simplexity's all-natural and unique non-calcium dietary supplement has been scientifically proven *in vitro* to promote bone health.*

Actions to help prevent bone density loss

- ❖ Eat a balanced diet rich in calcium and vitamin D
- ❖ Exercise regularly, using light weights
- ❖ Refrain from smoking and avoid excessive alcohol use
- ❖ Take OsteoSun and other dietary supplements to maximize bone health*

NOTE: No one action alone is enough to prevent bone density loss. Practice them all and enjoy the results!

Calcium alone is often not enough to maintain bone health. OsteoSun fills the gap—literally! Studies have shown that OsteoSun can significantly increase bone mineral density. Taken daily, OsteoSun is a safe and all-natural way to help maintain bone health and strength.*

What makes OsteoSun so distinctive?

OsteoSun is a very special formulation based on red yeast rice, a natural food product that has been used for centuries in Oriental cuisine for a variety of health benefits. Using patented technology, many different strains of red yeast rice were tested, but only the strain that is the most bone active was chosen for use in OsteoSun. Unlike other products on the market, OsteoSun enhances the body's natural ability to restore bone mass, and is scientifically proven *in vitro* (in a test tube) and in an animal model to build new bone.*

OsteoSun also contains Omega Sun® Super Blue Green® Algae, which, in addition to all its other benefits, aids in the assimilation of red yeast rice.

If you are concerned about bone health, OsteoSun may be just the product for you. Give your bones the extra support they need to stay healthy with Simplexity's OsteoSun!*
