

# PLANeT FOOD®

2 Pounds ..... Item #24-100

- ◆ Provides a macrobiotic nutrient system for healthier trees, lawns, shrubs, flowers, fruits, and vegetables
- ◆ Contains Super Blue Green® Algae to stimulate microbial activity in soil
- ◆ Includes volcanic rock dust for a broad spectrum of natural trace minerals
- ◆ Helps enhance resistance to pest problems, drought, and cold
- ◆ Offers a completely natural, earth-friendly product to enhance your plants

## A GARDEN PRODUCT WITH A GLOBAL VISION

The air you breathe, the water you drink, and the food you eat are all affected by the chemicals released daily into the environment. Organic gardening means working with nature to maintain the health of the soil without synthetic fertilizers.

Algae-rich PLANeT Food® slowly releases trace minerals and proteinaceous materials, which are all important nutrients for microorganisms and plants. These materials are not washed away into the ground water as quickly as dry synthetics are, so less time and money is spent on the feeding of your plants.

For the cultivation of healthy plants—both indoor and outdoor—the synergistic nutrients in PLANeT Food are specially formulated to stimulate a burst of microbial life within the root zone of your plants. Plus, no other garden product available offers a combination of ancient volcanic rock dust combined with Super Blue Green Algae.

# PLANeT FOOD®

## Applications

**Frequency:**

Use monthly. If you start to see white deposits on the soil from mineral residue, cut back frequency or amount of application.

**Potted Plants:**

Work one teaspoon per six-inch pot into soil.

**Lawns and Gardens:**

Spread one pound per 100 square feet.

**Trees:**

Apply one ounce for each inch of tree trunk diameter.

**Compost:**

Apply ½ pound per cubic yard in layers.

**Water:**

Mix one teaspoon in one gallon of water and apply to plants.

*Safe - Will Not Burn  
Not for Human Consumption*

**GUARANTEED ANALYSIS:**

**1-0-0**

Total Nitrogen (N)	0.94%
Available Phosphate (P <sub>2</sub> O <sub>5</sub> )	0.07%
Soluble Potash (K <sub>2</sub> O)	0.15%
Calcium (Ca)	9.3%

## Ingredients

Volcanic rock dust, Super Blue-Green® Algae (*Aphanizomenon flos-aquae*)

## A Word About Soil Fertility

A garden is only as good as its soil. Because very few soils are ideal, much of a gardener's effort is dedicated to improving and maintaining this complex entity. Good soil provides the optimal setting for organisms which do the essential work of dismantling molecules into elements such as nitrogen and phosphorus, so that they may be absorbed by plants. Synthetic fertilizers cause deficiencies in certain nutrients but scientific studies have shown that organic remineralization techniques can help enhance soil nutrient bioavailability by achieving optimal growth of soil microorganisms.

## A GARDEN PRODUCT WITH A GLOBAL VISION

*Continued from previous page*

PLANeT Food is a specially formulated blend of premium freeze-dried Super Blue Green Algae (*Aphanizomenon flos-aquae*) from Upper Klamath Lake and volcanic rock dust mined from an ancient seabed. It provides a broad spectrum of natural trace minerals to augment the soil's mineral balance and microbial activity, and it builds a sponge-like soil structure that retains air and water together

with soil nutrients. PLANeT Food restores depleted soil and maintains ecosystem balance and harmony the way nature intended—from the ground up.

As always, adapting nature's own elegant, time-tested methods will be far more effective than trying to force human chemistry on plants. Let Simplexity's powerful PLANeT Food unlock the potential in all your plants.
