

StemPlex: A Harmony of Nature & Science

The Formula

StemPlex contains botanicals already proven to help maintain a healthy lifestyle. What makes StemPlex such a pivotal product is the synergistic effect these botanicals have when combined in this formula. This means that the increase in stem cell production gained from using StemPlex is far greater than the increase that occurs through use of the ingredients individually.

This unique proprietary blend aids your body's natural repair and renewal system—delivering the results you are looking for!*

Highlights

- StemPlex is a natural product shown to increase adult stem cell proliferation by as much as 70%.†
- Simplexity Health employs a first-rate Quality Assurance program, and manufactures high-quality, science-based phytoceutical products.
- Developed by reputable, leading stem cell scientists, StemPlex is supported by their original research.

The Synergistic Ingredients

Green Tea Extract:

Green tea extract has been shown to improve the healthy environment of the digestive tract, and to maintain a healthy respiratory system.* Green tea also enhances the proliferation of stem cells in the body as well as being a powerful antioxidant.

Wild Blueberries & Wild Blueberry Extract:

Wild blueberries have many proven health benefits, which include increasing the proliferation of adult stem cells. Blueberries also support vision health, heart health, brain health, joint health, and urinary tract health.

Carnosine: Carnosine may delay the natural aging of cells and extend the lifespan of adult stem cells. Carnosine is an essential antioxidant that helps protect against free radical damage of tissue—even brain cells!

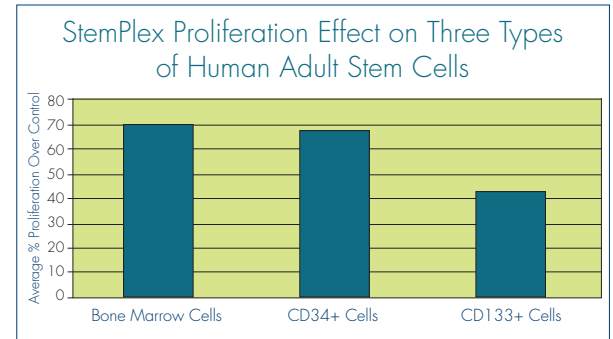

Vitamin D3: Cholecalciferol, the most effective form of vitamin D, supports adult stem cell renewal and assists stem cells in becoming immune cells!* Vitamin D3 is important for bone health, strong immune function, and heart health.*

Blue-Green Algae: Blue-green algae is nature's nanotechnology! Algae delivers a vast array of micronutrients that supercharges your body's ability to maintain superior overall physical well-being. This formula contains organic Alpha Sun® algae.

The Research

StemPlex is an all-natural adult stem cell proliferation product supported by solid scientific research. StemPlex was formulated by renowned university researchers Dr. Paula Bickford and Dr. Paul Sanberg, who lead a team of world-class stem cell scientists. Their work is funded by the National Institutes of Health, the Veterans Administration, and other government sources.

StemPlex: Why It's So Special

As we grow older, the process for creating new cells slows. That is why it is so important to give your body the fuel it needs to stay healthy and repair itself naturally. StemPlex is a proprietary blend of all-natural plant ingredients based on a patent-pending formula. This synergistic combination of powerful plant ingredients has been proven **to increase adult stem cell production up to 70%!†**

* These statements have not been evaluated by the Food & Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

† This testing was done *in vitro* and the increases noted are for three different types of adult stem cells.

StemPlex is the marriage of cutting-edge scientific discovery and ancient wisdom.
